

ARTS & ENTERTAINMENT

Whether you need it for a day, for a week or to bring the show on the road, across the U.S or around the world, the TopTent™ is the ticket.

The perfect shape for a stage performance

The circular shape as well as its interior space, free of any obstacles, makes it the perfect tent for any form of entertainment. Its geometry allows the tent to be laid out into a round format, an Elizabethan format or a proscenium arch pattern. The design lends an intimate feel to any cultural event.

One-day event

Since it only takes 15 minutes to set up, the TopTent™ can be installed and removed the same day, avoiding extra costs associated with the use of conventional tents. Conventional tents usually require a two-day set up and removal period as well as night watch and site remodeling after the removal of the tent. These costs can be avoided with the use of a TopTent™ and, with the money saved, the tent rental fees will pay for themselves.

Tours and road shows

Given its high mobility TopTent™ is ideal for tours and road shows. Once emptied of its contents, the TopTent™ is ready to hit the road in half an hour, making it the easiest part of your gear to pack. And it doesn't require extra labour costs since tour staff can easily operate the tent mechanism. Also, because the fabric never touches the ground, cleaning costs and time are very limited.

Tent capacity

Because the TopTent™ is a clearspan, there's no limit to the type of layouts you can create. With an Italian setting, where the audience is in front of the stage, TopTent™ can hold from 150 to 190 people. Up to 200 people can sit around a 16-foot circular stage and 250 people can be accommodated standing. When the weather is nice, the doors of the TopTent™ can be rolled up, to create more of an outdoorsy feel while at the same time protecting the artists and the material in the tent from the sun and the wind. If need be, the doors can also quickly be lowered.

The ability to support a heavy load

The TopTent™'s ability to support up to 2 tons of material means it can easily be transformed into an ideal performance hall. Setting up lighting, sound and projection equipment, as well as sets, is a simple process. Not only that, but video, images and animations can be projected onto the side panels of the tent, which are almost completely vertical.
