

SPORTS AND OUTDOOR ACTIVITIES

Organizers of sporting and outdoor events need a tent that is solid, highly visible and easily accessible. With its portability and minimal set-up time the TopTent™ can go where the action is.

A highly-mobile clearspan tent

For a race, rally or other sporting event the TopTent™ can serve as a point of departure, arrival, or even both. In fact, because it can be set up and taken down in less than 15 minutes, it can serve as the starting point in the morning, be moved to another location after the competitors set off, and serve as the point of arrival several miles away!

Maximum accessibility

As it does not require anchoring under normal circumstances, the TopTent™ can be set up on a wide variety of surfaces, such as grass, asphalt, gravel and stone, making it suitable for a wide range of sporting events. In addition, the absence of reinforcing stakes and guy ropes outside the tent frees the surrounding area up for participants and equipment.

A four-season clearspan tent

Regardless of the weather outside, the TopTent™ provides shelter for a sporting event's registration counter and operational headquarters. It can easily be converted into a centrally-located medical station or pressroom. In very cold weather, heating via forced air or radiators can provide optimal comfort inside the tent.
